

# The Value and Impact of CHESTNUT HEALTH SYSTEMS

Health centers provide tremendous value and impact to the communities they serve, including **JOBS** and **ECONOMIC STIMULUS, SAVINGS** to Medicaid, and **ACCESS** to care for vulnerable populations.

This report highlights the **Chestnut Health Systems** 2020 savings and contributions.

## ECONOMIC STIMULUS

## SAVINGS TO THE SYSTEM

## CARE FOR VULNERABLE POPULATIONS

**4,406** PATIENTS SERVED

**94.75%** of patients are LOW INCOME

**31.7%** of patients identify as an ETHNIC OR RACIAL MINORITY

## INTEGRATED CARE

**1,810**  
Patients received at least one ENABLING SERVICE (nonclinical service) to overcome barriers to care

# OVERVIEW OF ECONOMIC CONTRIBUTION ESTIMATES

## References and Data Sources

- Economic Stimulus: Economic impact was measured by [Capital Link](#) using 2020 IMPLAN Online from IMPLAN Group LLC, IMPLAN System (data and software), 16905 Northcross Dr., Suite 120, Huntersville, NC 28078, [www.IMPLAN.com](http://www.IMPLAN.com). Learn more at [www.caplink.org/how-economic-impact-is-measured](http://www.caplink.org/how-economic-impact-is-measured).
- Savings to the System: Nocon et al. Health Care Use and Spending for Medicaid Enrollees in Federally Qualified Health Centers Versus Other Primary Care Settings. American Journal of Public Health: November 2016, Vol. 106, No. 11, pp. 1981-1989.
- Care for Vulnerable Populations: Bureau of Primary Health Care, HRSA, DHHS, 2020 Uniform Data System.
- “Low Income” refers to those who earn below 200% of federal poverty level guidelines.
- Full-Time Equivalent (FTE) of 1.0 is equivalent to one full-time employee. In an organization that has a 40-hour work week, an employee who works 20 hours per week (i.e., 50 percent of full time) is reported as “0.5 FTE.” FTE is also based on the number of months the employee works. An employee who works full time for four months out of the year would be reported as “0.33 FTE” (4 months/12 months).

## Economic Contribution Estimates

IMPLAN® has developed a comprehensive analysis tool for estimating the two kinds of impacts in addition to the direct economic activity of the health center itself: those resulting from the supply chain of the local businesses that support the health centers’ operations, and those resulting from the local expenditure of income earned by employees of all businesses affected. These two community impact effects combined with the economic activity of the health center itself make the economic contribution to the area larger than simply the health centers alone.
