The Quarterly Journal of Inebriety

Is the official organ of the AMERICAN ASSOCIATION FOR THE  
CURE OF INEBRIATES, and will contain the transactions of this  
Association, with other contributions from leading specialists  
in this new field.

Subscription \$3.00 a Year in advance. Single Numbers \$1.00.

All communications, subscriptions, exchanges, and books for  
review should be addressed,

T. D. CROTHERS, M. D.,  
SECRETARY,  
BINGHAMTON, N. Y.

A Brain and Nerve Food

VITALIZED PHOSPHATES

Prepared from the nerve-giving principles of the Ox brain and Wheat germ, not a laboratory compound, but a living phosphate. Physicians have prescribed 150,000 packages in all forms of nervous disorders, overwork of the brain, weakness, and feeble digestion. They are especially useful in the nervous sufferings, dreams and sleeplessness that accompany and follow the use of alcoholic liquors, preventing the moral and physical prostration, and relieving the craving desire for drink. They build up vitality, and re-energize the nervous system and induce changes so permanent and radical as to be the nucleus of a fresh and more healthy mind and body for all subsequent life.

F. CROSBY, 686 Sixth Ave., New York

HORSFORD'S ACID PHOSPHATE  
IN CHOLERA.

By the researches of Dr. Koch, it is now known that acids are most useful to kill the cholera microbe, and have been successfully employed by the profession in Europe.

Dr. CHAS. CATHERALL of Chicago, in his "Treatment of Cholera," says: "As it is known that the cholera microbe does not flourish in acid solutions, it would be well to slightly acidulate the drinking water. This may be done by adding to each glass of water half a teaspoonful of Horsford's Acid Phosphate. This will not only render the water of an acid reaction, but also render boiled water more agreeable to the taste. It may be sweetened if desired. The Acid Phosphate, taken as recommended, will also tend to invigorate the system and counteract debility, thus giving increased power of resistance to disease. It is the acid of the system, a product of the gastric functions, and hence, will not create any disturbance liable to follow the use of mineral acids."

A recent report from Bangkok, Siam, states the facts in the case of a native who was attacked with cholera. The usual treatment failed to afford any relief, and the case appeared hopeless. It occurred to the attending physician to try Horsford's Acid Phosphate. After the second dose the patient commenced to recover, and in six hours after, he was pronounced out of danger.

Plumbers and free. Physicians desiring to test Horsford's Acid Phosphate will be furnished a sample, without expense, except express charges.

BEWARE OF IMITATIONS AND DANGEROUS SUBSTITUTES.  
RUMFORD CHEMICAL WORKS, PROVIDENCE, R. I.

These works also manufacture Prof. Horsford's baking preparations, which are made of acid phosphate in powdered form. These preparations restore the nutritious elements that are taken from the flour in bolting. No other baking powder, or anything else used for raising bread, does this. The use of these preparations is positively beneficial to health.  
The Horsford Almanac and Cook Book sent free.

## LISTERINE

The standard antiseptic for both internal and external use.

**NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC—  
ABSOLUTELY SAFE, AGREABLE, AND CONVENIENT.**

LISTERINE is taken as the standard of antiseptic preparations. The  
imitators all say, "It is something like LISTERINE."

**BECAUSE** of its intrinsic antiseptic value and unvariable uniformity,  
LISTERINE may be relied upon to make and maintain surgically  
clean—aseptic—all living tissues.

**IT IS AN EXCELLENT** and very effective means of conveying  
to the innermost recesses and folds of  
the mucous membranes that mild and efficient mineral antiseptic, boric acid,  
which it holds in perfect solution; and whilst there is no possibility of poisonous  
effect through the absorption of LISTERINE, its power to neutralise the products of  
putrefaction (thus preventing septic absorption) has been most satisfactorily  
determined.

*A special pamphlet on catarrhal disorders may be had upon application.*

**FOR DISEASES OF THE URIC ACID DIATHESIS:**

**Lambert's LITHIATED HYDRANGEA.**

A remedy of acknowledged value in the treatment of all diseases of the urinary  
system and of especial utility in the train of evil effects arising from a uric acid  
diathesis. A pamphlet of "Clippings" of editorials on this subject may be had by  
addressing:

**LAMBERT PHARMACAL CO., St. Louis.**

*Be assured of genuine Listerine by purchasing an original package.*

## LISTERINE

### In Summer Complaint

The absolute safety of Listerine, its well-defined antiseptic power, and the readiness with which it lends itself to combination with other indicated remedies, are properties which have led many physicians to adopt Listerine as the antiseptic foundation of their prescription for Summer Complaint.

#### Summer Complaints of Infants and Children.

A 12-page pamphlet on this subject, containing many valuable suggestions for treatment, may be had upon application.
